

My trip to the Hong Kong Wetland Park

Last Friday, I went to the Wetland Park with my classmates. This was our school visit, we went to the Wetland Park to collect information to do the project.

First, we went to see the insect exhibition, there were much information about insects, and we saw a big snake. It was very dangerous. We felt crazy. Then, we went to the Pui Pui's Home. There was endangered Chinese alligator called Pui Pui. We can see the crocodile there. It was very cool. And most of the classmates also took pictures with it.

After that, we went to the Bird Hide at riverside. That's a house which has three floors. I went to the lower floor and used the microscope to see the birds and ducks. We saw some ducks were playing with each other and some birds were finding food for their baby birds.

Finally, we went to the Mangrove Walk and saw the pond. Many classmates took picture there because the view was so beautiful.

After this school visit, we learnt more information about birds and some animals. It was so exciting.
