S2 Writing competition

2nd runner-up

2B (7) Chu Yan Ki

Scared Space Day

After 5 years training, Tom and Amy became astronauts. Amy had short hair and big mouth. Tom had big nose and short hair. They were very happy because this day was their first time going to space. In space, they were shocked. They saw a starry light in space. They were enchanted. "Amazing!" he replied overjoyedly. They were very happy in the spaceship. They saw many planets.

When they were talking about space, suddenly, the spaceship engine was not working. "What's happening?" he asked in shock. They felt frightened. They contacted the space tower, but they couldn't reach them. They felt nervous. They tried to repair the spaceship. They thought of many methods. Shortly after, the engine started working again. They felt very happy.

Hardly could they know it was another nightmare because the engine wasn't really working. The truth was another spaceship (UFO) was controlling their spaceship because the UFO was very cast, large and brightly-lit. "We will die!" she screamed. "UFO sucked up the spaceship!" She was shocked.

All of a sudden, an alien appeared in front of them. The alien began to speak, "I don't know what is says," Tom said. Amy replied, "Me too!" They felt very scared, they thought, "We will die!" and "Can we go home?" The alien took them to its spaceship. Their spaceship was very big and amazing. "People, you have to do the work in my spaceship for many years!" The alien ordered Amy and Tom. They were sad because they couldn't go home.

In the end, they worked for the aliens for two years. They knew spaceship mechanics. One night when the alien was sleeping, they went to the control room to contact the space tower.

The space tower replied, "Where are you?"

"We are in a big, green spaceship."

"Yes, in space, we found a spaceship. OK! We will take you out."

"We can go home," they said quietly.

Shortly after, the spaceship came. They were very happy because in these 2 years, they were treated badly, for example, no good food to eat, no place to sleep and most of time they were working. They went to the Earth. They were very happy they could see their family. But they would not forget the days they were in space.
