Subject: My Problem

Hi May,

How are you? Hope you are fine.

I was unhappy because I think back about my primary six. When I was in primary six, I thought I was a teenager already. I had a lot of teenage problems. Some bullies bullied me. I was very afraid of them. Every day they waited for me outside my classroom for every recess. They got my pocket money and did not let me talk to others. First, I didn't talk to the teacher and my parents because I was afraid that they would hit me and get my pocket money again, so I didn't talk to my friends too!

Then, when they didn't notice me, I ran away and went to find the social worker and talked to her about my problem. She gave me some useful advice and told me to talk to my teachers and my parents. I listened to her useful advice and talked to my parents and teachers. Although I felt very afraid of the bullies, I also told my parents and teachers.

At last, I told the teachers and they punished the bullies and protected me. Now I felt very free and happy and can do the things I want and they gave back all the money they stole from me. It was so free for me!

Cheers,
Chris
