

## **My School**

Hi, I'm Andy, now I'm going to introduce my school to all of you. My school has many activities and school clubs, such as Flag Guard, Marching Band, Red Cross, school choir and so on, they are all held on Tuesday. Almost all the students join the school clubs for their hobbies. And you can join the school clubs or change it every single school year.

My school also has a lot of school facilities, such as library, computer room, laboratory and so on. Library is a place that we borrow books. There are many kinds of books, like Chinese, English, Geography and History. Computer room is a place where we have computer lessons. There are two computer rooms in my school. They're all on the sixth floor. And laboratory is a place for doing science experiments. We sometimes go there for having science lessons.

My School has many nice teachers, and our principal is Mr. Ng. He's a kind and humorous person. We don't have any stress when we're beside him. And I have two class teachers – Miss Choi and Miss Chong. They're very helpful and kind. When we have any problems on study, they'll help us patiently.

And my class is 1D, it's a Chinese elite class. There are thirty pupils in my class. Emily is the best student in my class. She has the same English name as me. She's good at all the subjects, especially Chinese and Mathematics. Although she's clever, she likes playing with us too. She always helps us in our homework and plays with us when taking break.

This is my school, which has many activities and school clubs. There are a lot of school facilities and also many nice kind teachers and students. This is – Tseung Kwan O Heung To Secondary School!
