

A diary entry after going to Ocean Park

By 2B Peko Ng

1st November, 2012

Dear Diary,

Today, all Form 2 students went to Ocean Park to learn about animal conservation and low carbon life and did an interview with an animal trainer.

First, we took a class photo there. Then, my friends and I went to the Grand Aquarium to see marine life, like sea lions, sharks and dolphins. They are my favourite animals, so I stayed there for a long time. I took a lot of photos for my homework as well.

After that, we took Ocean Express to Thrill Mountain. We played a lot of rides there, like Hair Raiser, Rainforest and Arctic Blaster. They are very fun and exciting.

Later, at 1:30pm, we went to Dolphin Snapshot. We went backstage to meet the dolphin trainers. Miss Ho asked us to stand beyond the yellow line to see the dolphins so that we couldn't touch them or hurt them. Then, we interviewed a trainer about his job. After that, we went to a classroom to investigate threats that the dolphins face and learn how we can save wild dolphins in our daily life.

In this trip, I learnt a lot of threats that the animals face and how we can save them in our daily life, so I will protect all animals and live in a low carbon life.
