

Your best friend – QQ Dog

When you feel sad, do you want somebody to stand by you? When you live alone, do you want someone to stay with you? Micro Company has recently designed a QQ Dog, which is the robot pet controlled by the remote control. It can absolutely fulfill your desire.

It is made of black and silver plastic and the shape of robot is the same as the real dog with ratio 1:1. However, it is more fashionable and modern.

The QQ Dog has multifarious functions. For example, if you push the 'Singing' button, it will sing a great deal of songs randomly and with dancing. Another attractive feature is that it can speak, which is the same as 'Siri' of Iphone. No matter what you talk to it, it can give you some suitable responses. It can certainly become your sincere good friend.

Please don't hesitate! Go to our website www.microdog.com or call 9999 9999 to order our latest robot dog – QQ Dog. It only costs HK \$100. If I were you, I would reserve it at once.
